

Driver Earnings Structure

1. Earnings & Mileage:

- **Base Fare:** Each ride starts with a fare determined by the miles traveled.
- *Example:* A ride that costs \$18.00 covers all the miles driven during that trip.

2. Deductions & Take-home:

- **Up to \$299.00 in earnings:** A 40% deduction is applied.
- *Example:* For rides totaling \$54.00, your take-home is \$32.40.
- **Over \$299.00 in earnings:** If the payment owed to you exceeds \$299.00, be aware that a 50% deduction will be applied, affecting your overall earnings.
- *Example:* For rides amounting to \$320.00, you'll receive \$160.00.

3. Payment Threshold:

- A balance between \$34.00 and \$40.00 must be attained before any payment is processed. This measure ensures both frequent rides and efficient payment handling.

4. Payments:

- **Via App:** Payments are processed within 4 business days, weekends excluded.
- *Example:* If you request a cash-out on Monday, anticipate your payment by Friday.
- **Invoicing:** Occasionally, customers might be directly invoiced, skipping the app procedure. This is particularly relevant for major events, group rides, or for those less familiar with tech or the elderly.
- *Example:* For a large event with many senior attendees, direct invoicing might be favored over app usage.
- **Alternative Methods:** If you face issues with the app or encounter special situations, multiple payment options are available:
 - PayPal
 - Cash App
 - Google Pay

Special Notes:

- For orders completed between the 1st and 15th of a month, payments are deposited on the 25th of that very month.
- Medical runs come with a 40% deduction from the total amount due on each payday.

- If the amount owed to you surpasses \$299.00, be prepared for a 50% deduction to be applied.
- Only residential home pickups qualify for the same day's pay. Medical runs do not offer this benefit.
